Exterminate Your Bugs to Lower Software Costs

Top 5 things you can do right now!

What's really bugging you? -- Project overruns, schedule slips, low software quality, causing lost revenue? Much like your home, unsuspecting, damage-causing bugs can invade your software project -- making it a mess. This presentation covers five simple, yet proven things you can do right now to eradicate software bugs early in the software development lifecycle. If bugs are creeping you out, come find out how to rid yourself of them and dramatically lower your software costs.

- Software Testing
- Oracle E-Business
- Quality Assurance
